How are the casks at VY being monitored for leaks, and, however unlikely, what will happen if one of these casks does spring a leak.

What will be the financial relationship between the government and these private interim storage facilities? Who will pay to transport privately owned HLWaste to privately owned interim storage facilities?

Also, as is recommended by the President's Blue Ribbon Commission (and the NWPAA?), will the NRC and DOE honor the premise that no interim or permanent storage of HLNW shall be imposed upon any community without the express permission of that community?

If the efforts by Speaker Pelosi and Senator Feinstein in current legislation fail to provide path forward for private interim storage facilities, will the NRC withdraw its approved license for Interim Storage Partners' facility in Andrews, TX and halt the licensing process for Holtec's New Mexico facility?
